ADVANCING MOTION

Garrett® Series 60 Original Equipment Turbochargers

Are you running a K31 (non-Garrett type) Turbo on your series 60?
If so you could be significantly penalizing yourself!

Compressor Stage Map Comparison

Garrett® OE matched performance could be saving you as much as \$2400 annually in fuel economy.*

Garrett® Series 60 Original Equipment Turbochargers

- **Patented boreless compressor wheels** for the highest performance, durability and reliability.
- **Expertly matched turbine and compressor stages** ensure your engine receives optimal airflow for the application.
- **Best in class pricing** – whether supplying your customers or purchasing a Garrett® Series 60 for your truck, know that you are receiving the best value by choosing a dealer in the Garrett® Authorized Distributor Network for your business.

* Calculations based on 100,000 annual miles driven and diesel fuel at \$4/gallon. Test comparison used 714788-5001s, 714792-5002s and 172743 turbochargers. Total fuel economy impact based on target road load operating conditions. Individual driving habits and conditions may vary causing a difference in actual fuel savings.
