

EXTEND SERVICE LIFE
GENUINE TURBOCHARGERS

2005+ MERCEDES / DODGE /
FREIGHTLINER 3.0L ENGINES

EXTEND SERVICE LIFE

2005+ MERCEDES / DODGE / FREIGHTLINER 3.0L OM642 ENGINES

The original turbocharger used on this application uses a “casting-type” compressor wheel in a Garrett® brand GT-20 model. The NEW Garrett® direct fit for Mercedes/ Dodge/Freightliner genuine turbocharger upgrade boasts a machined-from-solid “Billet” compressor wheel. This wheel can increase in-service life by up to 300% from the original wheel design and may reduce service costs and downtime for Sprinter Van users. If your vehicle usage and experience has shown a less than two year turbocharger life due to compressor wheel failure, this upgrade is right for you.

Features:

- Produced by the OEM
- Direct Fit Replacement
- Increase In-Service Life
- Reduce Service Costs
- Compatible with Mercedes, Dodge and Freightliner 3.0L

Part Number	777318-5003W	
Model	GTB2056VK
