Intercooler Upgrade for the 2015+ 2.3L EcoBoost Mustang

The Honeywell Garrett intercooler upgrade fits the 2015+ 2.3L EcoBoost Mustang in the stock location and can support up to 600 horsepower. It features an aluminum core that is 60% larger than stock with advanced offset fin design and vacuum brazed bar-and-plate construction resulting in superior thermal and fatigue performance. The CFD optimized cast aluminum end tanks reduce recirculation and maximize flow. Overall, the complete assembly results in up to a 30% reduction in pressure drop and 40 degree reduction in charge air temperature.

Part Number:857564-6001

INTERCOOLER SPECS:	INCHES	MILLIMETERS
Core Length	21.00"	533.40mm
Core Height	5.75"	146.05mm
Core Width	5.32"	135.13mm
Inlet Diameter	2.75"	69.85mm

**Capable of supporting
up to 600 horsepower**

Benefits:

- Rated up to 600 horsepower
- 60% larger core than stock
- Up to a 40 degree reduction in inlet temperatures
- Up to a 30% reduction in pressure drop
- Elongated inlet and outlet ports for improved hose attachment
- CARB E.O. # D-794 approved 50 state emission legal performance upgrade
