

QUICK REFERENCE GUIDE

Heavy Duty Starters & Alternators

NOTE: Interchange by using a competitor part number is not positive identification. Certain competitor part number interchanges are included at popular request, but absolute correlation is not possible. No responsibility is assumed by remanufacturer or publisher for consequential or other damages which may arise from reliance on a competitor part number to make identification.

DISCLAIMER of WARRANTY: The information contained herein has been obtained from reliable sources and is accurate insofar as is ascertainable. However, no warranty is either expressed or implied as to the accuracy of this catalog and no responsibility is assumed by the publisher for any damages. The acceptance of this catalog is conditional to the acceptance of the disclaimer of warranty.

Any reference to part numbers or manufacture company names listed throughout this catalog are for reference purposes only and are in no way indicative of the origin of the goods.

Alternators 1
 Listing of alternator part numbers by product model family. Includes product specifications, new and remanufactured replacements and upgrade options.

Starters32
 Listing of starter part numbers by product model family. Includes product specifications, new and remanufactured replacements and upgrade options.

Service Notes.....73
 Defines footnotes identified in the starter, alternator and competitor cross reference sections.

Model Index77
 Identifies a part number's model family if unknown.

Competitor Cross Reference96
 Identifies Delco Remy replacements for competitive part numbers.

21SI, 22SI, 23SI and most
Leece Neville alternators

External Fan

24SI and 28SI alternators

Dual Internal Fans (DIF Style)

1 Dual Internal Fan Alternators

When replacing an alternator with an external fan, with one that has an internal fan alternator, DO NOT take the external fan from the original model and apply to the internal fan alternator. This will result in pulley and belt misalignment.

Long Pad Models

33SI, 34SI, 35SI, 36SI, 40SI

Short Pad Models

22SI, 23SI, 24SI, 28SI

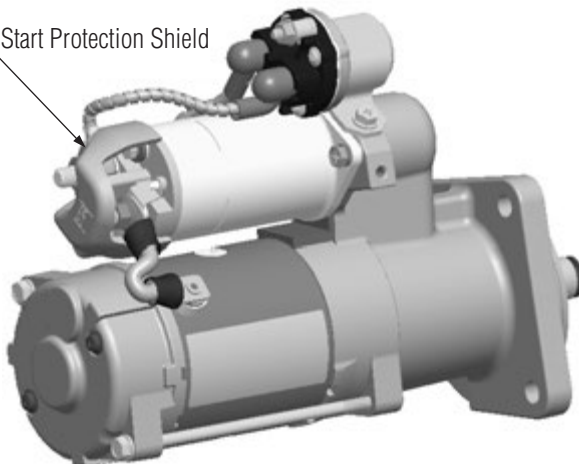

2 Pad Mount and Engine Mounting Brackets

Use the pre-existing engine mounting bracket holes to easily upgrade from a competitive model. The same can be done when going from a Delco Remy alternator with shorter pad mount style to the premium brushless longer pad mount style.

3 No Pulley

Replacement alternator does not have a pulley.

Jump Start Protection Shield

4 28MT Starters with Jump Start Protection

If the original starter has a Jump Start Protection shield installed over the starter solenoid terminals, it is recommended that the shield is transferred to the replacement model. Or, purchase shield part # 10473386 from your genuine Delco Remy distributor or dealer.

5 Starter Commutator End Rotated 180 Degrees

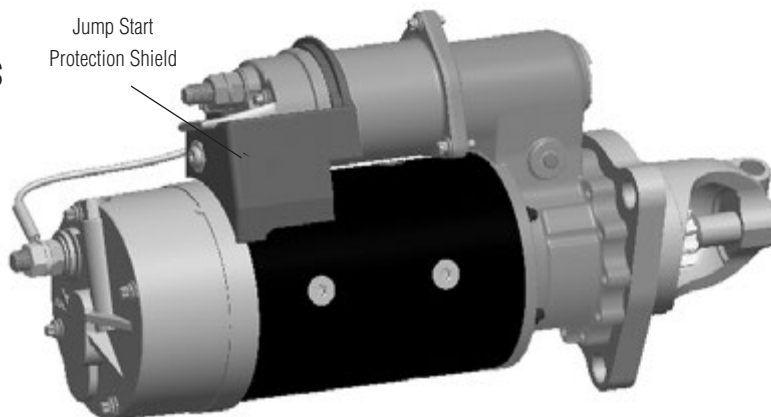

The original starter model's commutator end (CE) may be rotated 180 degrees different than the replacement starter. **IMPORTANT:** make sure terminal connections are made properly and OEM wiring harnesses length is appropriate.

6 Original Starter Ground Terminal in the Frame - Replacement Starter Terminal in the Back End

The original starter model has the ground terminal located in the starter frame. The replacement model ground terminal is located in the back of the starter. It is important to identify this difference. Make sure the starter ground cable is properly grounded on the replacement starter.

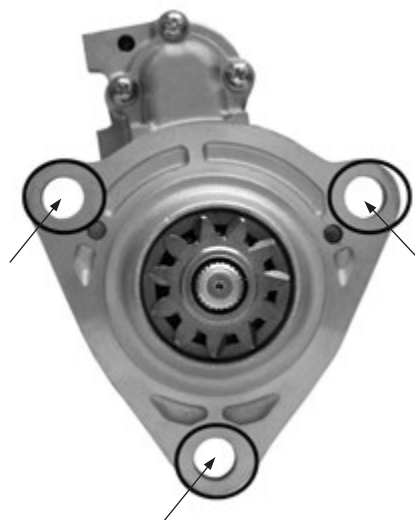

7 37MT/41MT/42MT Starters with Jump Start Protection

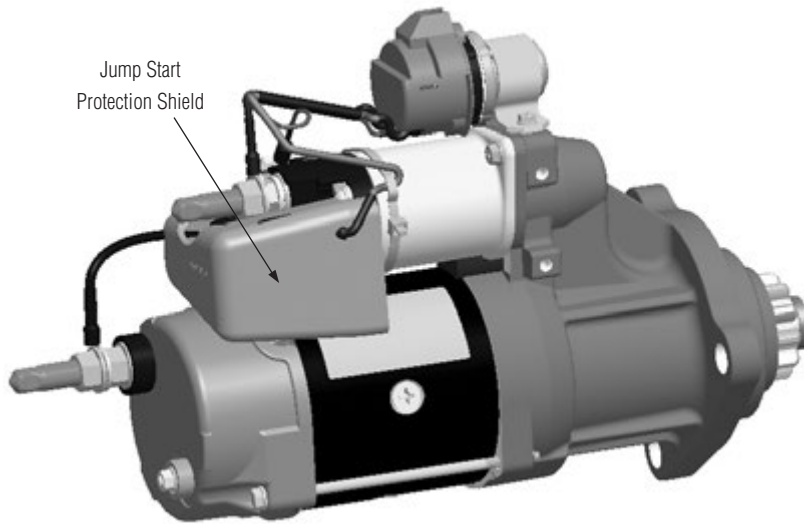

If the original starter has a Jump Start Protection shield installed over the starter solenoid terminals, it is recommended that the shield is transferred to the replacement model. Or, purchase shield part # 10456430 from your genuine Delco Remy distributor or dealer.

8 Starter Mounting Hole Differences

The replacement starter model may have slightly larger diameter mounting holes than the original starter model. It is recommended that a hardened washer (5 grade or better) is used with each mounting hole for the replacement starter model.

9 39MT Starters with Jump Start Protection

If the original starter has a Jump Start Protection shield installed over the starter solenoid terminals, it is recommended that the shield is transferred to the replacement model. Or, purchase shield part number 10511411 from your genuine Delco Remy distributor or dealer.

10 Replacement Model does not have OCP

The replacement starter DOES NOT have OCP (over crank protection) - the original starter model does have this feature.

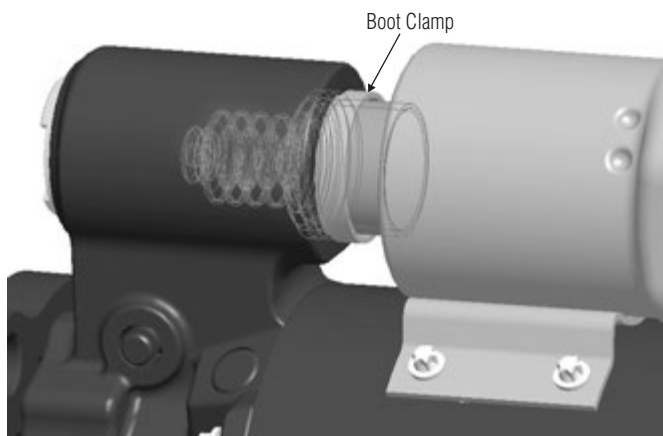

11 IMS Switch Position

The IMS switch on this replacement starter motor may need to be repositioned. To provide flexibility to our customers, this replacement Starter Motor comes equipped with 6 sets of mounting holes that are designed to allow for maximum flexibility when positioning the IMS Switch.

12 Solenoid Position Slightly Different

The position of the solenoid on this replacement starter motor is different than the position of the solenoid on the OE Model. This replacement starter motor comes equipped with a rotatable flange design and the solenoid will need to be repositioned (by removing the 6 bolts on the front of the flange) and rotating the flange so that the solenoid is in the same position as the OE Model.

13 Has OCP Replacement part number has OCP (over crank protection)

14 Starter Boot Clamp

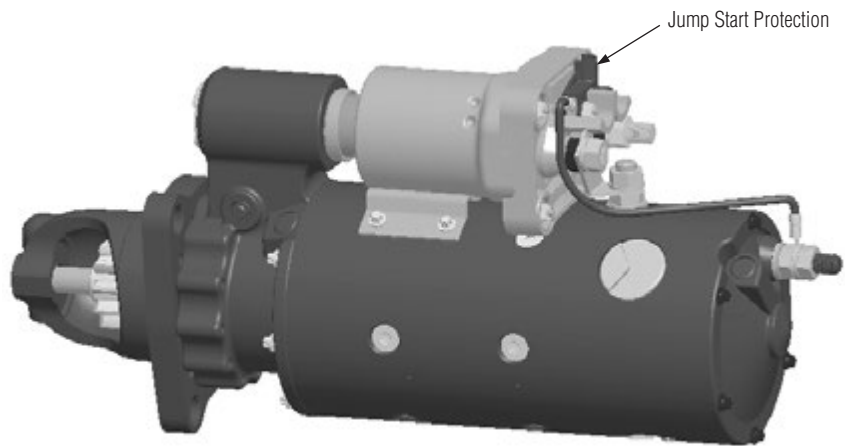

The original starter has a boot clamp installed on the solenoid for improved sealing determined necessary by the OEM. Please consider the application and operating environment if the replacement option does not provide this boot clamp sealing feature.

15 Solenoid position slightly different

The replacement starter model solenoid switch position is slightly different (within 15 degrees) than the original model. Need to confirm starter fit-up for proper installation.

16 50MT Starters with Jump Start Protection

If the original starter has a Jump Start Protection shield installed over the starter solenoid terminals, it is recommended that the shield is transferred to the replacement model. Or, purchase shield part number 10489059 from your genuine Delco Remy distributor or dealer.

17 Non-Rotatable Flange

The replacement part number has a non-rotatable flange.

18 No IMS Switch

The replacement part number does not come equipped with an IMS switch.

19 Has IMS Switch

The replacement part number comes equipped with an IMS switch.

Part Number Search Application Search Family Search Service Parts Search

Part Number Search Contains

- This search has the ability to cross Delco Remy, Remy, and competitor part numbers.
- The part number entered will be stripped of spaces, dashes, and special characters.
- This is a wildcard search that requires at least four characters to be entered.

Four ways to find what you need

1. Part Number Search: Cross Delco Remy, Remy and competitive part numbers

2. Application Search: Look up applications by year, make and model – Heavy Duty applications are now available

3. Family Search: Select model family and use filters to find part numbers with similar features

4. Service Parts Search: Look up service parts for Delco Remy starters and alternators by product family or part number
